
Helix Factor

the basic helix-loop-helix transcription factor myc2 ... - localized basic helix-loop-helix-type transcription factor known as myc2 (boter et al., 2004; lorenzo et al., 2004), which acts as both an activator and a repressor to regulate diverse aspects of ja-mediated gene expression (dombrecht et al., 2007). a family of jasmonate zim domain (jaz) proteins was identified as the **basic helix-loop-helix transcription factors jasmonate ...** - followed by derepression of myc2, a basic helix-loop-helix (bhlh) transcription factor that plays a central role in ja signaling, resulting in transcriptional activation of downstream target genes (lorenzo et al., 2004, chico et al., 2008; katsir et al., 2008). however, the ja-insensitive phenotype in the myc2 mutant is weaker **the basic helix-loop-helix transcription factor family in ...** - the basic helix-loop-helix transcription factor family in plants: a genome-wide study of protein structure and functional diversity marc a. heim,* marc jakoby,* martin werber,* cathie martin, bernd weisshaar,* and **the arabidopsis basic/helix-loop-helix transcription ...** - the arabidopsis basic/helix-loop-helix transcription factor family gabriela toledo-ortiz, enamul huq, 1 and peter h. quail 2 department of plant and microbial biology, university of california, berkeley, california 94720, and united states department of agriculture-agricultural research service plant gene expression center, albany, california ... **fiber optic system test procedures - datasysperformance** - refraction of the fiber optic cable, and the helix factor of the fiber optic cable (if available). step 2. connect the otdr to one end of a launch cable (may also be called a "dead band" cable). launch cables are necessary for most otdr units because the otdr is effectively "blind" for some distance from the light launch point. **structure/function relationship in dna-binding proteins** - helix-turn-helix (hth) motif ! ~20 amino-acid long dna-binding motif. ! formed by two helices connected by a short turn. ! the second helix is the recognition helix that binds in a sequence-specific manner in the major groove. ! the first helix stabilizes the motif. ! examples ! e. coli lactose repressor ! homeobox domains: appear in **acceptance testing of fiber optic cable using an otdr by ...** - not include the cable's helix factor, which is a measure of the difference in fiber versus cable sheath length. the technician must compensate for the extra fiber slack by adjusting the otdr's refractive index ... acceptance testing of fiber optic cable using an otdr (continued) page 4 of 4 ©2013, the light brigade, inc. **design, installation and testing of helical piles & anchors** - design, installation and testing of helical piles & anchors ... of one or more helix-shaped bearing plates attached to a central shaft, which is installed by rotating or "torqueing" into the ground. each helix is ... † allowable loads are based on a factor of safety of two (2). **engineering design manual - helical anchors** - engineering design manual . page | 2 edm rev 02 ©2014, helical anchors inc. ... (factor of safety) - margin of safety is the difference between the ... the nominal pitch of each helix is three inches and to ensure that each of them develops full capacity, each succeeding plate is located above the preceding plate a distance equal ... **improved thermodynamic parameters and helix initiation ...** - improved. also, an initiation factor should be improved because enthalpy change of a helix initiation factor has been assumed to be 0 kcal/mol for dna/dna and rna/rna parameters (1,2). although new nearest-neighbor parameters for predicting dna/ dna duplex stability were reported on the basis of a small **effect of geometry factor i & j factor multipliers in the ...** - effect of geometry factor i & j factor multipliers in the performance of helical gears lamit d. modi, 2manan b. raval, 1lecturer, 2lecturer, ... the helix angle ψ is the prime property to describe any helical gear. it always measured on the cylindrical pitch surface fig.8. **eukaryotic transcription factors: the dna binding domain** - contain characteristic dna binding domains or motifs. infact, eukaryotic transcription factors are categorized into distinct families based on the type of dna binding motifs they contain eukaryotic transcription factor families 1 helix-turn-helix proteins 2 zinc finger proteins 3 leucine zipper proteins 4 helix-loop-helix proteins **14.5 geometry factors i and j z and y - ksu faculty** - 1 14.5 geometry factors i and j (z i and y j) the determination of i and j depends upon the face-contact ratio m f. this is defined as: (14-19) where p x is the axial pitch and f is the face width. for spur gears, m f = 0 low-contact-ratio (lcr) helical gears having a small helix **chance helical anchor/pile bearing capacity** - determination of helix capacity in a cohesive or fine-grained soil can be accomplished with equation 5-8 with the second term eliminated. when this equation is applied to helical anchors/piles, the n c factor is
